Summary

As a seasoned professional with Almost 4 Years of Experience in the tech realm, I've navigated the landscapes of software engineering and data analytics, each phase adding depth to my skill set.

Backend Maestro: For 2.5 years, I honed my expertise as a Senior Software Engineer, mastering the intricacies of backend technologies, system design, database architecture as well as various cloud technologies .My Journey included managing leadership responsibilities , multiple project management , providing mentorship to amazing young folks.

From Code to Insights: Transitioning into the realm of data, I've embraced the role of a Senior Data Analyst. My focus lies in the world of Machine Learning modeling, where I thrive on deciphering patterns, extracting insights, and crafting compelling narratives from data. I'm not just about algorithms; I'm about stories that data tells.

Passion for Impact: I believe in the transformative power of data and the stories it unfolds. Whether it's architecting systems for efficiency or unraveling the tales hidden in datasets, my goal is to drive meaningful impact through technology.

What Drives Me: The intersection of technology and human experience fuels my passion. I'm driven by the belief that every line of code and every data point has the potential to shape a better, smarter, and more connected world.

Open to Collaboration: I thrive in collaborative environments where diverse skills converge. If you share a passion for leveraging technology to make a difference, let's connect and explore the possibilities!

Experience

Accenture

Analytics Practitioner

November 2022 - Present (3 years 9 months)

Kolkata, West Bengal, India

As a Senior Data Analyst, I leverage Python and ML Processes, Algorithms, libraries to develop and implement innovative machine learning models and solutions that improve business outcomes and support R&D initiatives.

Work closely with clients to identify new business opportunities and develop data-driven solutions that align with organizational goals. Create dynamic reports and dashboards using Python, Power BI, and Excel, and use data visualization tools to communicate insights that drive decision-making.

CarePlix

2 years 6 months

SDE-II: Senior Software Engineer (Backend)

September 2021 - November 2022 (1 year 3 months)

Kolkata

I work with the stack of Python 3 , AWS ,postgresql and backend related tools . My day to day tasks include Database designing , API designing , System Design , also deployment and testing databases and APIs using AWS and other tools . I also take Interviews for the Recruitment of New Candidates for my Organization .

SDE : Backend Developer

June 2020 - September 2021 (1 year 4 months)

Kolkata

I work with the stack of Python 3 , AWS ,postgresql and backend related tools . My day to day tasks include Database designing , API designing , also deployment and testing databases and APIs using AWS and other tools

Resto-G

Software Developer

March 2020 - June 2020 (4 months)

Kolkata Area, India

Contract basis work

Self Employed

Freelance Software Engineer

June 2019 - December 2019 (7 months)

Kolkata Area, India

Worked For a Company Named Jobcircuit on Freelance Contract basis

Education

Indian Institute of Technology Hyderabad

Master of Technology, MTech Data Science (CSE) · (July 2024 - July 2027)

Meghnad Saha Institute Of Technology(MSIT)

Bachelor of Technology - BTech, Information Technology · (2015 - 2019)
